DPS-19 **CONTROL PANEL**

The DPS-19 control panel is a simple and robust solution designed to allow wired control over DSE electronic siren. DPS-19 allows user for quick control over the siren by easy to use virtual keyboard and microphone.

ADVANTAGES AND FUNCTIONS

TRIGGER THE SIREN ALARMS
The control panel allows to trigger up to 8 siren alarms and messages in DSE electronic siren.

SIREN TEST
DPS-19 has a TEST function that allows you to perform silent amplifier test using 16 kHz inaudible sound.
Also user can view status of recently performed test.

LIVE VOICE MESSAGES
Thanks to built-in microphone dispatcher can transmit any voice messages via DSE electronic siren.

PARAMETER CONTROL
DPS-19 enables constant monitoring of DSE siren parameters, including main power supply state, amplifiers, voltage in both batteries, siren operating temperature, siren anti-burglar alarm and charging state from solar panels.

PROTECTION
Access to the control panel can be protected by a PIN. In addition DPS-19 has an automatic logout function.

UNAUTHORIZED ACCESS
If a tamper is detected in the siren an audible alarm sounds and a message appears on the desktop screen informing the dispatcher about a burglary.

PERMANENT OPERATION
DPS-19 is powered from an electronic siren by the PRS-485 module. In case of a 230 V power supply failure the control panel allows for uninterrupted operation thanks to siren batteries.

TECHNICAL PARAMETERS

Power supply	24 V DC +/- 5 V DC (through the PRS-485 module attached to the set connected to PC-550)
Max. current consumption	70 mA
Communication with DSE siren	point-to-point UTP CAT.5E cable (max. 500 m)
Virtual keyboard	color touch screen 3,5"
Audio	built-in „gooseneck" microphone
Material	ABS plastic
Dimensions	50 H x 90 W x 165 D mm (without microphone)
Weight	412 g
Warranty	24 months
